Name :- Pramit Sahoo
Roll no :- 1860191903

1) Synthesis of 5-HT :-

Histidine
↓ decarboxylase
Histamine → Imidazole acetic acid (Diamine oxidase)
Histamine → N-methyl histamine (N-methyl transferase)
N-methyl histamine
↓ MAO
Methyl imidazole acetic acid.

2) Serotonine receptors :-

H_1 : i) GPCR (G_q)
ii) Works by IP3/DAG or cAMP pathway.
iii) Present in smooth muscle (intestine, airway, uterus
iv) Works in allergic inflamation.

H_2 : (i) GPCR (G_s)
(ii) Works by cAMP pathway
(iii) Present in gastric gland, blood vessel atria of he
(iv) Gastric acid secretion.

H_3 : (i) GPCR (G_i / G_o)
(ii) Works by cAMP pathway
(iii) Present in brain, lungs, spleen.
(iv) helps in neurotransmitter.

H_4 : (i) GPCR
(ii) Works by cAMP pathway.
iii) Present in haemopoetic cell, spleen, thimus.
iv) Increase chemotaxis in mast cells.
